

SMAART Minds — Course Architecture & Learning Flow

1. Introduction

SMAART Minds is a career readiness platform designed to measure, build, and certify professional capabilities. Unlike traditional LMS systems, SMAART focuses on behavioral skills and produces a Skills Passport with a verified readiness score.

2. Platform Overview

The platform begins at the Dashboard, leading to 'My Courses', where students access the Human Intelligence Programme and parallel tracks.

3. Core Programme — Human Intelligence

The core programme consists of 25 courses divided into three stages:

Stage	Focus	Courses
Capacity	Self-management & Thinking	10
Capability	Collaboration & Communication	9
Leadership	Influence & Decision Making	6

4. Course Structure

Each course follows an 8-step learning flow: Why, Story, Framework, Practice, Flash Card, Extended Practice, Case Study, Notes.

Assessment includes MCQ (15%), FIB (10%), and SJT (75%), focusing heavily on decision-making ability.

5. Readiness Tracks

Three parallel tracks run alongside the core programme:

Track	Focus	Courses
PIQ	Personal Intelligence	5
AIQ	AI Readiness	5
SQ	Sustainability	5

6. Progression Logic

Students must complete all courses in a stage and pass the corresponding assessment (T2, T3, T4) to unlock the next stage.

7. Assessment System

The system includes T1 (baseline), T2, T3, and T4 assessments. SJTs are scored using ranking logic to measure judgment instead of simple correctness.

8. Final Output

Upon completion, students receive a Skills Passport including SRI Score (300–900), quotient scores, and certifications.

9. Complete Flow

Dashboard → My Courses → Human Intelligence Programme → Stages → Tracks → Assessments → Skills Passport
