

3-Day Learning Structure with Complete Timing Breakdown

Overview

Each skill module in the course follows a **3-day structured learning framework** with **10 steps total** (Steps 0-9). This document provides the complete breakdown of what happens each day, the timing for each step, and what content needs to be pushed.

Total Time Per Module: 29 minutes (excluding student work time)

DAY 1: Cognitive Priming & Emotional Engagement

Focus: Orientation and Story-based Learning

Total Video Time: 14 minutes

Step 0: Skill Orientation

- **Type:** Video
- **Duration:** 2 minutes
- **Purpose:** Cognitive priming - What, Why, Where
- **Content to Push:**
 - Video URL (required)
 - Clear explanation of:
 - * **What** is this skill?
 - * **Why** is it important?
 - * **Where** will you use it?
- **Learning Outcome:** Student understands the skill's relevance and context

Step 1: Story Episode

- **Type:** Video
- **Duration:** 12 minutes
- **Purpose:** Emotional engagement through narrative
- **Content to Push:**
 - Video URL (required)
 - Story structure must include:
 - * **Setup:** Introduce characters and situation
 - * **Tension:** Present the challenge/problem
 - * **Decision:** Show critical decision moment

- * **Consequence:** Reveal the outcome
- **Learning Outcome:** Student emotionally connects with the skill through real-world scenario

Day 1 Summary: Student completes orientation and sees skill in action through storytelling

DAY 2: Framework & Transferability

Focus: Mental Model Building and Application

Total Video Time: 12 minutes

Step 2: SMAART Framework / Tool

- **Type:** Video
- **Duration:** 7 minutes
- **Purpose:** Transfer story into reusable mental model
- **Content to Push:**
 - Video URL (required)
 - Framework explanation:
 - * Break down the story into a **structured framework**
 - * Explain the **SMAART model** or relevant tool
 - * Show how to apply the framework step-by-step
- **Learning Outcome:** Student understands the systematic approach to the skill

Step 3: Domain Scenario Skin

- **Type:** Video
- **Duration:** 5 minutes
- **Purpose:** Demonstrate transferability across contexts
- **Content to Push:**
 - Video URL (required)
 - Different scenario using **same framework:**
 - * Show the skill in a **different industry/context**
 - * Highlight how the framework remains constant
 - * Emphasize adaptability
- **Learning Outcome:** Student sees how to apply the skill in various situations

Day 2 Summary: Student learns the systematic framework and sees its versatility

DAY 3: Micro-Assessment & Application

Focus: Assessment, Evidence, Reflection, and Mastery

Total Time: 3 minutes (video) + Student Work Time

Step 4: Micro-Assessment

- **Type:** Quiz
- **Duration:** ~10-15 minutes (student time)
- **Purpose:** Test understanding and decision-making
- **Content to Push:**
 - **Part A:** Scenario-based MCQ questions
 - * 3-5 multiple choice questions
 - * Each question presents a realistic scenario
 - * Options test understanding of framework application
 - **Part B:** Decision Trade-Off questions
 - * Present complex situations with trade-offs
 - * Require critical thinking
- **Learning Outcome:** Student demonstrates comprehension and application ability

Step 5: Evidence Task (Artefact)

- **Type:** Submission
- **Duration:** ~20-30 minutes (student time)
- **Purpose:** Proof of application in real context
- **Content to Push:**
 - **Instructions:** Clear task requirements
 - **Rubric:** Evaluation criteria
 - **Examples** of acceptable artefacts:
 - * Decision note
 - * Checklist created
 - * Framework application document
 - * Analysis report
- **Learning Outcome:** Student creates tangible evidence of skill application

Step 6: Reflection (NVQ-Style)

- **Type:** Reflection
- **Duration:** ~10-15 minutes (student time)
- **Purpose:** Learning transfer and self-assessment
- **Content to Push:**
 - **Likert Scale Statements** (1-5 rating):
 - * “I can apply this skill in my current role”
 - * “I understand when to use this framework”
 - * “I feel confident using this skill”

- **Forced-Choice Prompts:**
 - * “Describe a situation where you would use this skill”
 - * “What was the most valuable insight from this module?”
 - * “How will you apply this in the next 7 days?”
- **Learning Outcome:** Student reflects on learning and commits to application

Step 7: Founder Congratulatory Video

- **Type:** Video
- **Duration:** 3 minutes
- **Purpose:** Motivation and identity building
- **Content to Push:**
 - Video URL (required)
 - Founder’s message including:
 - * **Congratulations** on completing the skill
 - * **Motivation** to continue learning
 - * **Identity building:** “You are now someone who...”
 - * **Next steps** encouragement
- **Learning Outcome:** Student feels accomplished and motivated

Step 8: Flash Card + Interview Prep

- **Type:** Flashcard
- **Duration:** Reference material (no time limit)
- **Purpose:** Quick reference and interview preparation
- **Content to Push:**
 - **File URL** (PDF/Image)
 - **One-page summary** including:
 - * Key framework points
 - * Decision-making checklist
 - * Common interview questions on this skill
 - * Quick reference guide
- **Learning Outcome:** Student has portable reference material

Step 9: Post-Employment Application Trigger

- **Type:** Reflection (Optional)
- **Duration:** ~5-10 minutes (student time)
- **Purpose:** Track real-world application after employment
- **Content to Push:**
 - **Unlock Condition:** After internship/job placement
 - **Questions:**
 - * “Where did you apply this skill in your job?”
 - * “What was the outcome?”
 - * “How did it impact your work?”
 - * “What would you do differently next time?”

- **Learning Outcome:** Long-term application tracking and continuous improvement

Day 3 Summary: Student demonstrates mastery through assessment, creates evidence, reflects, and receives resources

Complete Timing Breakdown

Video Content (Instructor Creates):

Step	Type	Duration	Day
0	Skill Orientation	2 min	Day 1
1	Story Episode	12 min	Day 1
2	SMAART Framework	7 min	Day 2
3	Domain Scenario	5 min	Day 2
7	Founder Video	3 min	Day 3
TOTAL	Video Content	29 min	

Student Work Time (Estimated):

Step	Type	Duration	Day
4	Micro-Assessment	10-15 min	Day 3
5	Evidence Task	20-30 min	Day 3
6	Reflection	10-15 min	Day 3
8	Flash Card Review	5-10 min	Day 3
9	Post-Employment (Optional)	5-10 min	Later
TOTAL	Student Work	50-80 min	

Grand Total Per Module:

- **Instructor Video Content:** 29 minutes
 - **Student Active Learning:** 50-80 minutes
 - **Total Learning Time:** ~1.5 - 2 hours per skill module
-

Content Creation Checklist for Instructors

Day 1 Content:

- ☐ **Step 0 Video** (2 min): Skill orientation covering What/Why/Where
- ☐ **Step 1 Video** (12 min): Engaging story with Setup → Tension → Decision → Consequence

Day 2 Content:

- ☐ **Step 2 Video** (7 min): SMAART framework explanation with clear steps
- ☐ **Step 3 Video** (5 min): Same framework in different context/industry

Day 3 Content:

- ☐ **Step 4 Quiz:**
 - ☐ 3-5 scenario-based MCQ questions
 - ☐ 2-3 decision trade-off questions
 - ☐ Correct answers and explanations
 - ☐ **Step 5 Submission:**
 - ☐ Clear task instructions
 - ☐ Evaluation rubric
 - ☐ Example artefacts
 - ☐ **Step 6 Reflection:**
 - ☐ 3-5 Likert scale statements
 - ☐ 3-5 open-ended prompts
 - ☐ **Step 7 Video** (3 min): Founder congratulatory message
 - ☐ **Step 8 Flashcard:** One-page PDF with key points and interview prep
 - ☐ **Step 9 Reflection** (Optional): Post-employment questions
-

Student Learning Journey

Day 1 Experience:

1. Student logs in and starts Module
2. Watches **Skill Orientation** (2 min) - understands the “why”
3. Watches **Story Episode** (12 min) - emotionally engages
4. **Total Time:** ~15 minutes
5. **Feeling:** Curious and engaged

Day 2 Experience:

1. Student returns the next day
2. Watches **SMAART Framework** (7 min) - learns the system
3. Watches **Domain Scenario** (5 min) - sees transferability
4. **Total Time:** ~12 minutes
5. **Feeling:** Confident and ready to apply

Day 3 Experience:

1. Student returns for final day
2. Completes **Micro-Assessment** (10-15 min) - tests knowledge
3. Creates **Evidence Task** (20-30 min) - applies skill
4. Completes **Reflection** (10-15 min) - commits to application

5. Watches **Founder Video** (3 min) - feels motivated
6. Downloads **Flash Card** (5 min) - saves reference
7. **Total Time:** ~50-80 minutes
8. **Feeling:** Accomplished and equipped

Post-Employment:

1. Student gets internship/job
 2. **Step 9 unlocks** automatically
 3. Student reflects on real-world application
 4. System tracks long-term outcomes
-

Implementation in System

Backend Structure:

```
{
  dayNumber: 1,
  title: "Cognitive Priming & Emotional Engagement",
  description: "Orientation and Story Episode",
  steps: [
    {
      stepNumber: 0,
      title: "Skill Orientation",
      type: "video",
      content: {
        duration: 2,
        description: "Cognitive priming: What, Why, Where.",
        videoUrl: "https://..."
      },
      isRequired: true
    },
    // ... more steps
  ]
}
```

Frontend Display:

- **ModuleContentBuilder.js:** Instructors fill in content for each step
 - **CoursePlayer.js:** Students progress through steps sequentially
 - **Progress Tracking:** Each step completion is tracked
 - **Unlocking Logic:** Steps unlock in sequence (can't skip ahead)
-

Learning Science Behind the Structure

Day 1: Cognitive Priming & Story

- **Why:** Stories activate emotional memory, making learning stick
- **Science:** Narrative transportation theory - stories bypass analytical resistance
- **Outcome:** Student is emotionally invested in learning

Day 2: Framework & Transfer

- **Why:** Mental models enable systematic thinking
- **Science:** Schema theory - frameworks help organize and retrieve knowledge
- **Outcome:** Student has reusable mental model

Day 3: Assessment & Application

- **Why:** Active application cements learning
 - **Science:** Constructivism - learning by doing creates deeper understanding
 - **Outcome:** Student demonstrates competence and creates evidence
-

Scaling Across Courses

For a Full Course:

- **25 Modules Maximum** (each is a skill)
- **25 modules $\times$ 3 days = 75 days total**
- **25 modules $\times$ 29 min video = ~12 hours of video content**
- **25 modules $\times$ 1.5 hours = ~37.5 hours total learning time**

Recommended Course Structure:

- **Capacity Building:** 8-10 modules (foundational skills)
 - **Capability Development:** 8-10 modules (technical skills)
 - **Leadership:** 5-7 modules (soft skills)
-

Quality Assurance Checklist

Before publishing a module, ensure: - [] All video URLs are working and accessible - [] Videos have clear audio and visuals - [] Story in Step 1 follows Setup $\rightarrow$ Tension $\rightarrow$ Decision $\rightarrow$ Consequence - [] Framework in Step 2 is clearly explained with examples - [] Quiz questions are scenario-based and test application - [] Evidence task has clear instructions and rubric - [] Reflection questions encourage deep thinking - [] Founder video is motivational and congratulatory

- ☐ Flash card is one-page and interview-ready - ☐ All required fields are filled
 - ☐ Content is free of errors and typos
-

Support & Questions

If you need help with: - **Content Creation:** Contact instructional design team
- **Video Production:** Contact media team - **Technical Issues:** Contact IT support - **Framework Questions:** Refer to SMAART methodology guide
