

SMAART Minds - System Flow Documentation

Version: 1.0
Date: January 2026
Platform: SMAART Minds - Student Dashboard & Learning Management System

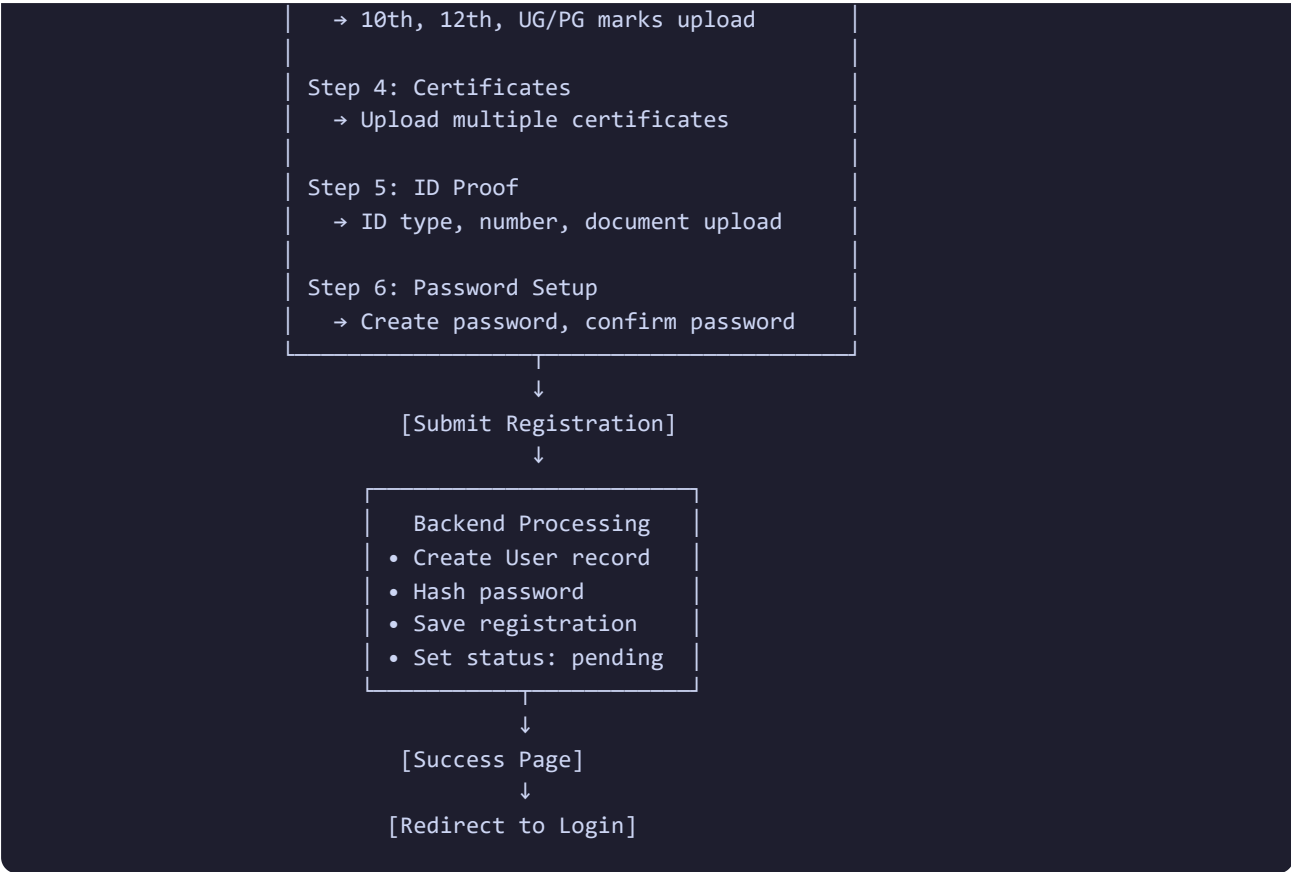

1. Overview

This document describes the complete user flow and data flow throughout the SMAART Minds platform, covering all major user journeys from registration to course completion.

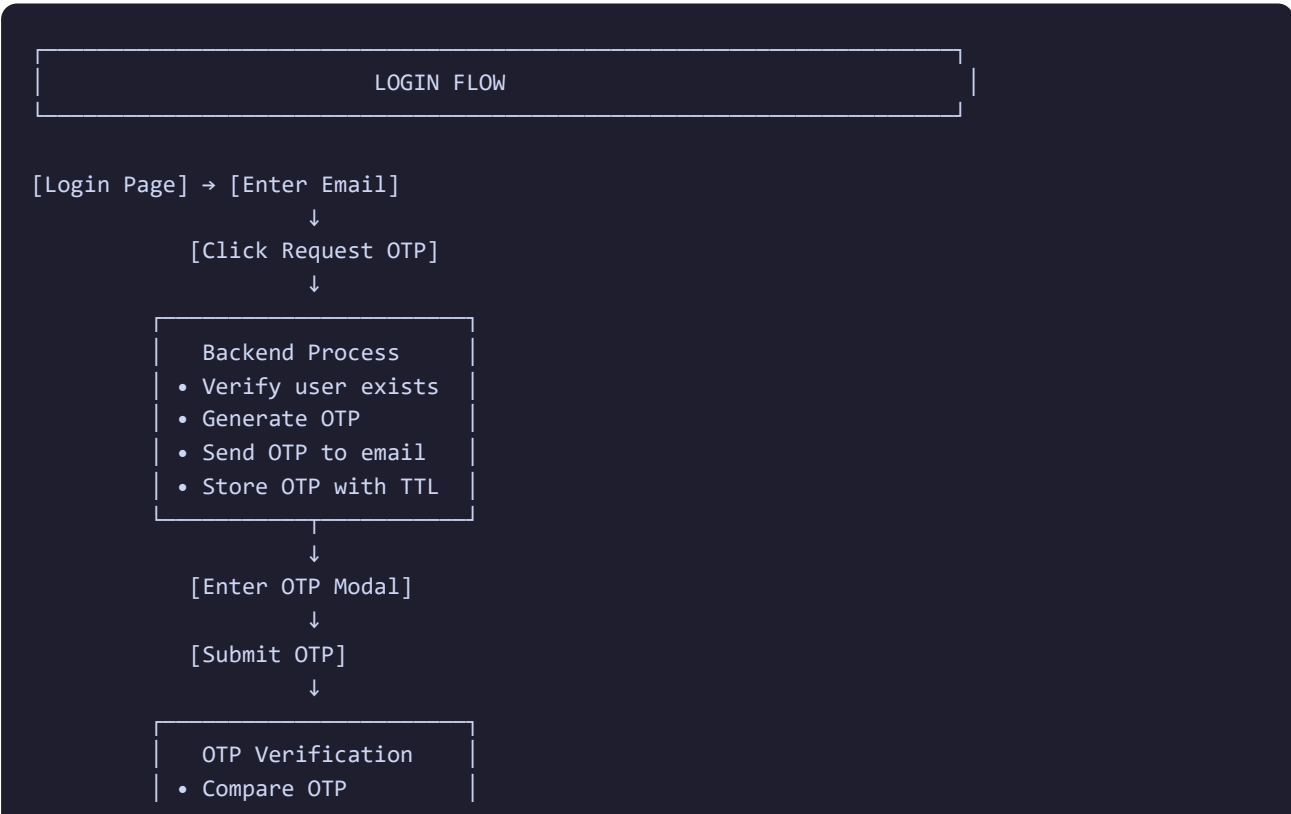

2. User Journey Flows

2.1 First-Time User Registration Flow

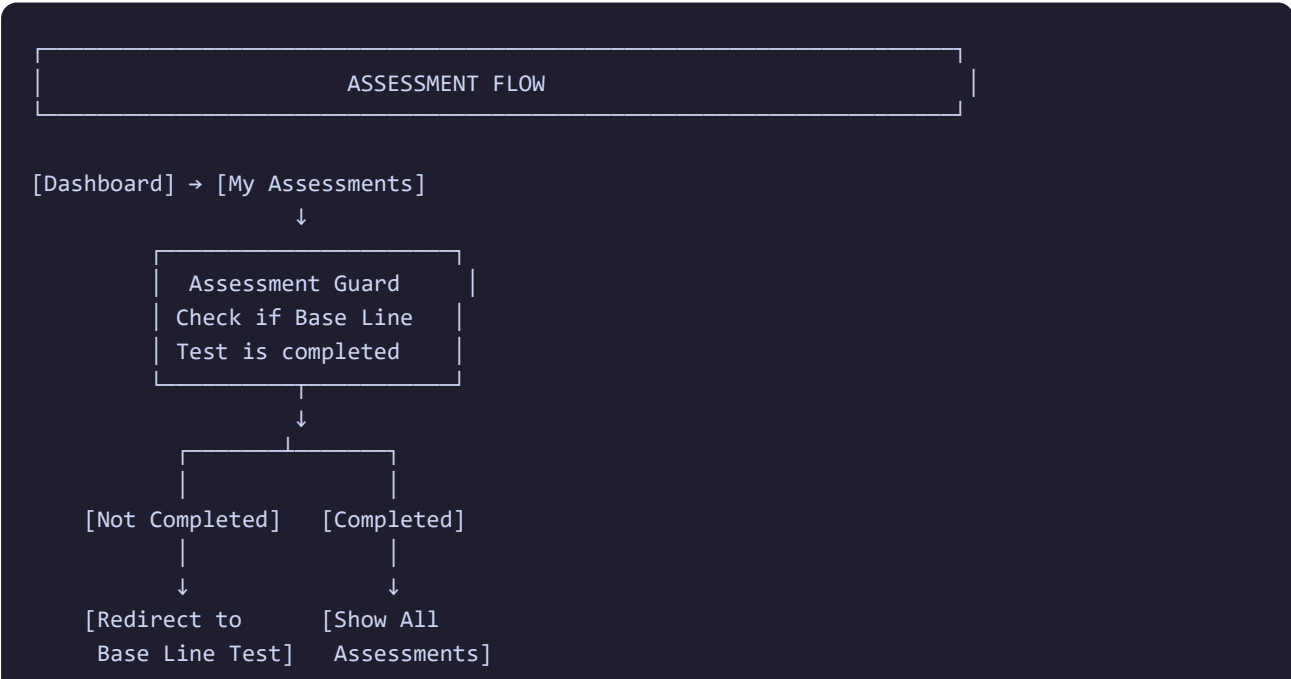

2.2 User Login Flow

2.3 Assessment Flow

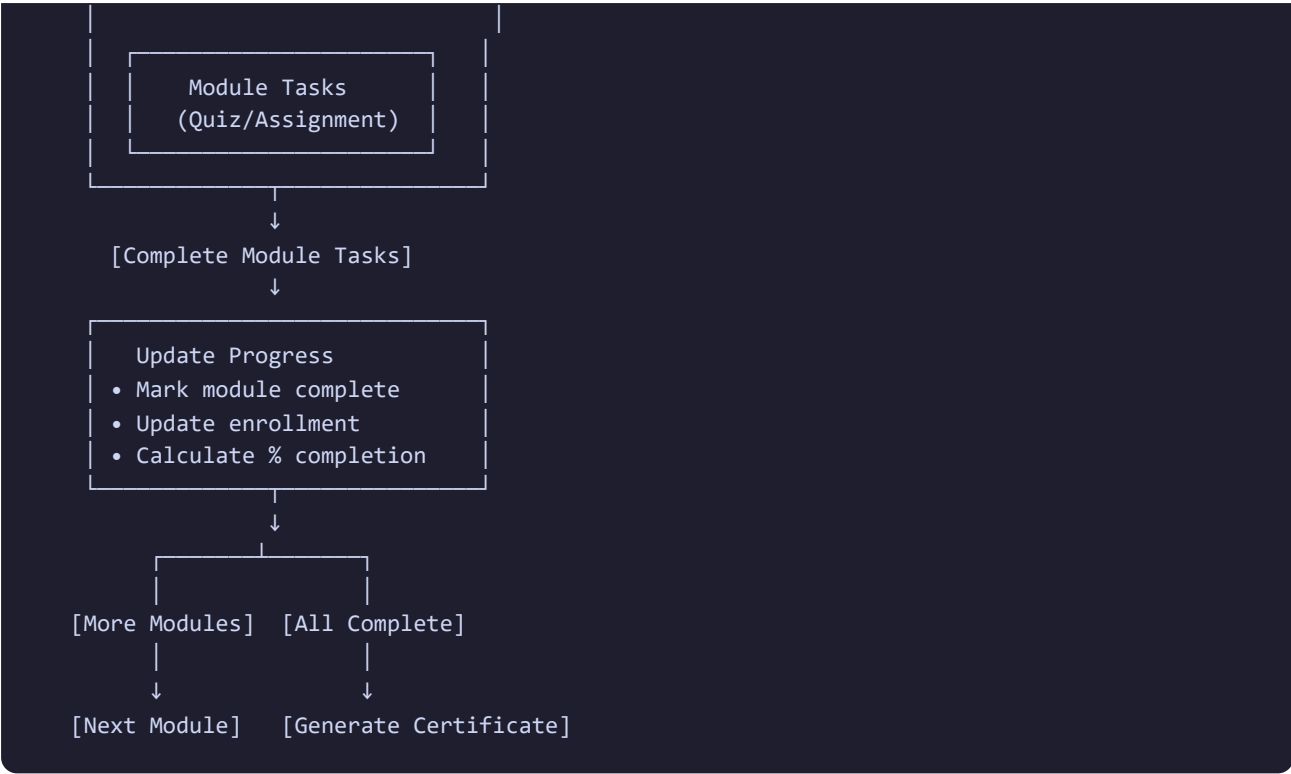

2.4 Course Learning Flow

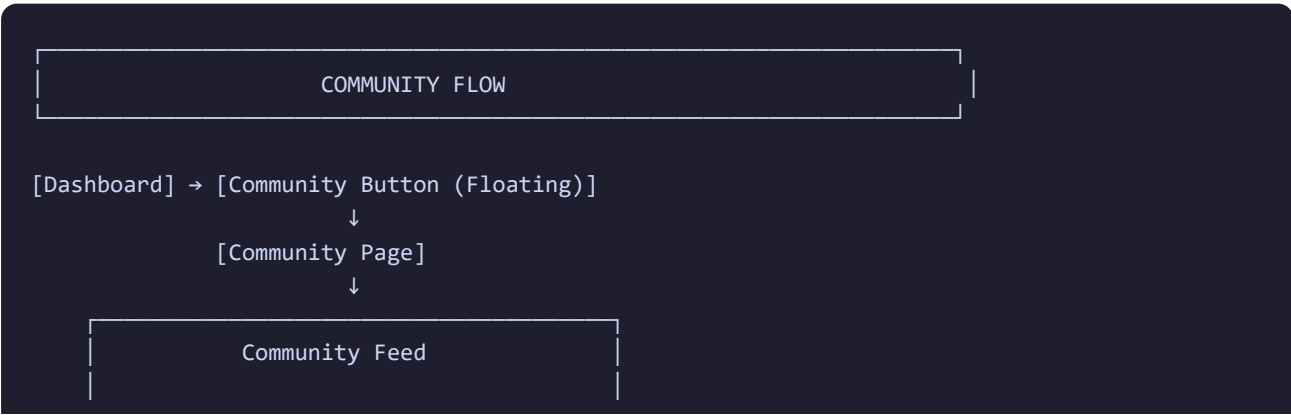

2.5 Support Ticket Flow

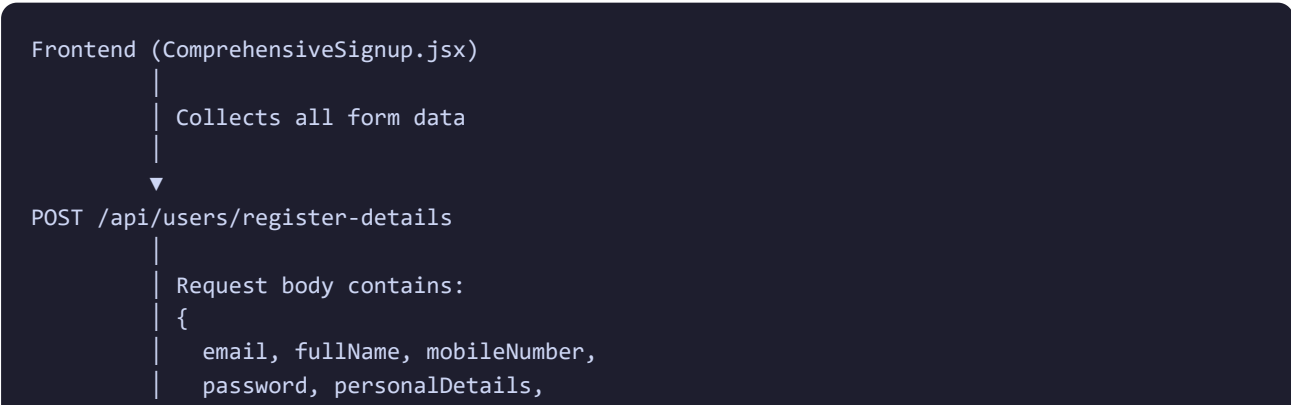

2.6 Community Interaction Flow

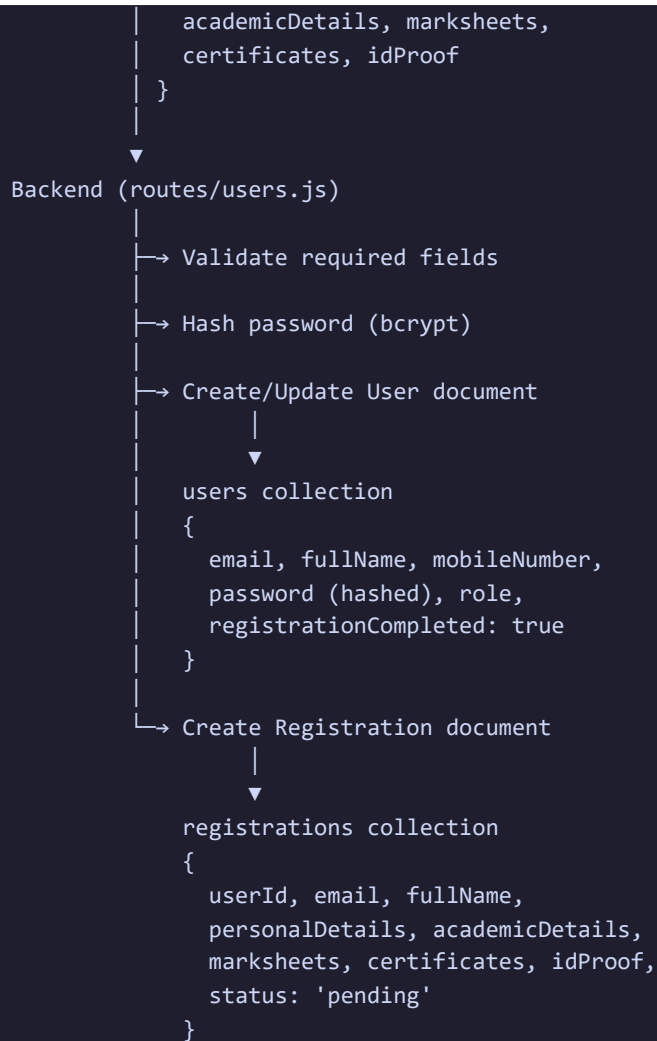

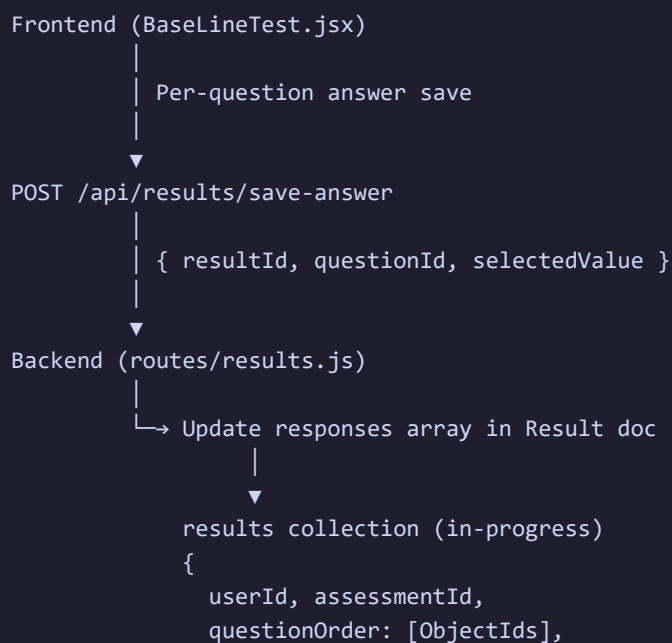

3. Data Flow Diagrams

3.1 Registration Data Flow

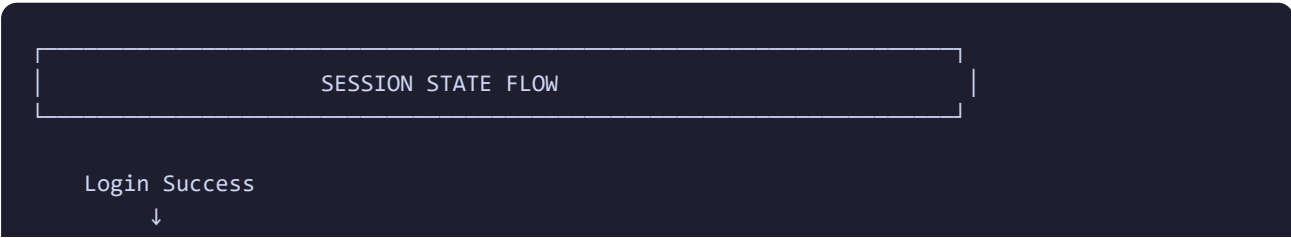

3.2 Assessment Results Data Flow

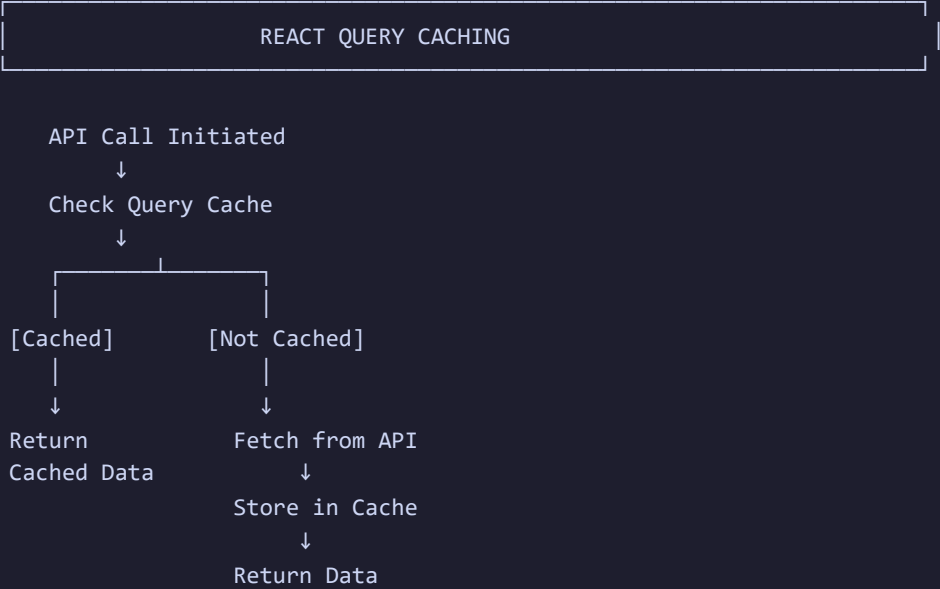

4. State Management Flow

4.1 Session State

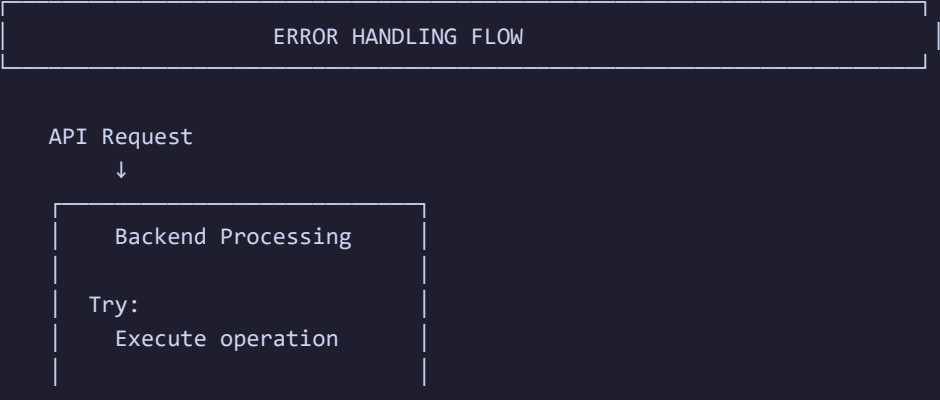

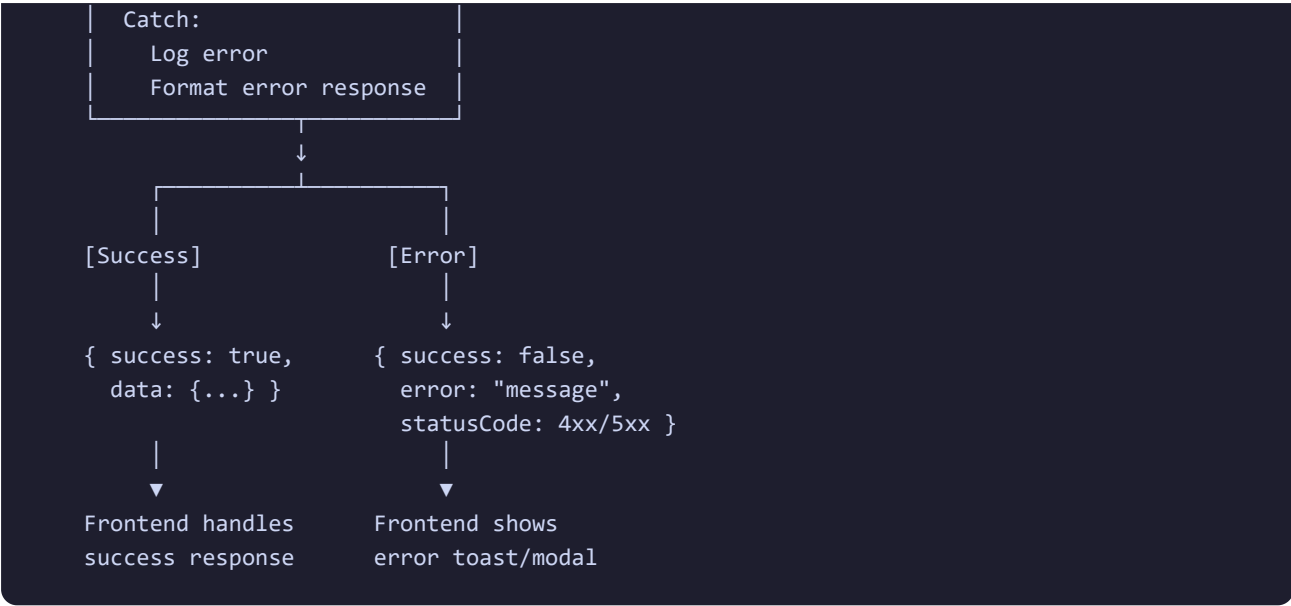

```
Store in sessionStorage:
├ token (JWT)
├ user { id, email, name, role }
└ registration { data }
  ↓
On Each API Call:
├ Read token from sessionStorage
└ Attach to Authorization header
  ↓
On Logout:
├ Clear sessionStorage
└ Redirect to login
```

4.2 React Query State

5. Error Handling Flow

6. File Upload Flow

```
size: 1234567  
}
```

7. Real-time Features

7.1 Assessment Progress Persistence

```
User answers question  
↓  
Immediate API call:  
POST /save-answer  
↓  
Server saves to MongoDB  
↓  
Response confirms save  
↓  
User can safely:  
├ Refresh page  
├ Close browser  
└ Return later  
↓  
On return:  
├ Fetch saved responses  
└ Resume from last question
```

7.2 Community Notification Badge

```
New post created  
↓  
Stored in database  
with timestamp  
↓  
User opens app  
↓  
Query: posts since last visit  
↓  
Display count on  
floating button badge  
↓  
User clicks community  
↓  
Update last visit time  
↓  
Badge resets to 0
```

Document End

This document outlines the complete flow of all major user interactions within the SMAART Minds platform. For implementation details, refer to the Technical Functionalities Document.
